

North Museum & Philatelic Society of Lancaster County continue partnership with the Passport to Discovery Program by adding to the new Visitor Discovery Packs

The North Museum's popular "Passport to Discovery" program is now part of the museum's reopening plan with its inclusion in Visitor Discovery Packs for all attendees.

The Passport invites guests of the museum to explore exhibits in a whole new way and introduces the wonder of Stamp Collecting with the generous donation of starter packets from the Philatelic Society of Lancaster County for all attendees. As visitors make their way through the museums' three floors, they are invited to add stamps to their passport and select locations along the way.

The Passport was included as part of the North Museum's new protocol implemented for reopening during COVID-19 restrictions. The Visitor Discovery Packs allows children to complete hands-on experiments, activities and challenges during their visit in a safe and secure way by providing supplies that can be collected and cleaned or, as with the Passport and stamps, taken home and enjoyed for continued learning experiences.

The packets also include Legos to be used in the museum's Lego Lab exhibit as well as information on the museum's newest feature, guided video tours accessed through QR codes.
