## I N T R O D U C T I O N

Thank you for your support of this reproduction of the C. H. Chappell check list of the cancellations on the 1898 Proprietary Revenue Stamps.

Due to many requests, there have been added two sections to his list. The first includes the cancels of firms whose names are known; the second includes cancels having initials only, whose names are not known to me. None of these is included in the Chappell list; they are the so-called "unlisted" cancels.

There are two indexes, one covering the names of all firms included in the original list as well as those in the first section of the addendum; the other lists the initials or cancellations of all the firms included herein.

The Chappell list includes some firms that used only a handstamp cancel. This is because Mr. Chappell desired to include all the firms which had a private die in 1898 as well as those firms which used provisional labels in lieu of stamps, which were not available in early July, 1898. Unfortunately, Johnson & Johnson was left out of his published list.

Mr. Chappell wished to list only printed cancellations, but felt he had to include as well the handstamped ones of firms which used printed cancels. This policy has been followed in the addendum.

It has been difficult at times to decide whether a certain cancel is a printed one or is a handstamp, for some of the handstamped cancels are very clearly impressed. Without additional stamps with the same cancel, it is almost impossible to decide, but I have had the assistance in this of Elliott Perry and George T. Turner ARA #200, and we have tended to include an item as printed rather than to leave it out as being a handstamp. One exception has been made, and that is to include those typewritten cancels that show clearly they were done on a machine by the paper having been broken by a period, a comma, or a dash. All other cancels of this style of font have been considered made from a stencil, and thus considered as a handstamp cancel.

Since Mr. Chappell feels he cannot be the clearing agent for the task of bringing his list up to date, I have decided to tackle it myself. My plan is to start from his original list, add those cancels which he has noted over the years, and add any that may be in my own collection, which Mr. Chappell did not have access to when he prepared his original list. This should provide a basis for checking items you have that are not in the Chappell list.

There are undoubtedly many cancellations in your collection which are not included in the lists herein. Thus, to bring the list up to date, I shall need YOUR help.

I call on YOU to advise me NOW what cancellations you own which are NOT of the firms in the Chappell list or in the addendum herein. In addition, I call on you NOW to let me know the dates and denominations of any cancellations which are not listed in the addendum.

Thus, I propose first to clear up all the cancellations of the firms not included in Mr. Chappell's list.

For convenience in filing, I suggest that you send me this information on 3 x 5 cards, showing the name of the firm at the upper left and, below, the type, value, date and color of the cancel as well as the method of separation, roulette or hyphen hole.

Later, when I feel that this field has been covered, it is my intention to make a call through the AMERICAN REVENUER for cancellations of firms included in the Chappell list but not known to him. This should be done in groups, and no doubt the first call will be for the firms whose names begin with the letters "A" and "B".

When I have finally written up a group of firms, some method of getting these lists to you will be devised, providing sufficient interest is manifested.

I wish to acknowledge the generosity of Harry Weiss, Editor of the WEEKLY PHILATELIC GOSSIP, which originally published the list, for permission to make this copy, and thank Clarence Henry Chappell ARA #33, the author, for his aid.

Members of our ARA have been most helpful. The task of getting my own material in order has been difficult, and I am obligated to George T. Turner, ARA #200, for the many hours he has spent with me on this project.

The following members, listed alphabetically, have kindly lent me stamps in order that drawings might be made of their cancellations: Harold W. Field #324, Abe Hochman #470, A. O. Imbler #99, and Henry Tolman II, #25.

The drawings were made by John C. Sherron, whose long and true labor is greatly appreciated.

In the rewrite, it is my hope to have a drawing made of each type of cancel for each firm and possibly some of the errors or subtypes to aid you in knowing your stamps.

# Proprietary Revenues of 1898, Precanceled Varieties

BY C. H. CHAPPELL

**W**HAT stamps are more interesting than the revenues? And when the specimen under inspection bears a bold printed cancelation; isn't there an added thrill in its acquisition?

The writer has been interested in precanceled U. S. revenue stamps for many years, with a decided leaning toward the battleship series of the Spanish War period, and has found them the most fascinating of all the revenue sidelines.

In the past, several attempts have been made to get these precancelations into listed form, but for various reasons, they were never successfully carried out. Mr. Franklin S. Smith, owner of the finest collection ever assembled, did splendid work with painstaking articles in the philatelic press, over a long period of years.

At the request of Editor Burns, I have undertaken a check list of these 1898 proprietary cancelations, and with the whole-hearted cooperation of collectors, feel certain that a presentable listing can be compiled.

Only the printed and typed cancelations will be given consideration in this list. The only exceptions being those few firms who also had private die stamps in this period. The hand-stamps of these few companies are of general interest and I feel they should be included. The listing will be alphabetical by proprietors, with types, dates and variations thereof, under each firm. The color is color of surcharge. Especial care will be taken in showing punctuation or lack of it, and upper and lower case letters as they actually exist. The letters "R" and "HH" signify rouletted and hyphen-hole perforated; the two styles of separation found on this issue.

In closing I earnestly request that all collectors having any of these precancelations send them to me for examination and prompt return, thereby assisting in the compilation of a worthwhile check list of these fascinating precancelations. Address me at 14 Sisson Street, Lyons, New York.

ASCHENBACH & MILLER  
PHILADELPHIA, PA.

*Type 1*—Three line horizontal printed cancelation, with the firm's name in full above, and city and state below; all in upper and lower case letters, and the date between them. The normal figure "1" has the regulation serif and a base. A different font figure "1" was used a few times in the dates and also a smaller "0" was occasionally used. These will be shown in the text as Font "B". The capital letter in the month is vertical.

Font "B"—the figure "1" has horizontal cross bars at both top and bottom. The "0" is one font smaller type.

DR. D. JAYNE & SON  
PHILADELPHIA, PA.

*Introduction*.—Various fonts of type were used in the dates of the different types. These are all carefully listed under each type as they occur. The ornamental bar was used between the lines on all the types. The date lines vary in length. Pairs, strips and blocks exist showing combinations of two and three different types from the same sheet. The following have been seen and others undoubtedly exist.

Combination No. 1—Types 3, 5, 7.

Combination No. 2—Types 3, 7.

Combination No. 3—Types 3, 5.

Combination No. 4—Types 1, 4.

*Type 1*—Two line horizontal printed cancelation in Roman type, with the initials above in a  $2\frac{1}{4}$  mm. font and the date below in a narrow 3 mm. font, and an ornamental bar between the lines. The date line is 12 mm. long.

*Type 3*—Two line horizontal printed cancelation in 3 mm. Roman type, with the initials above and the date below, and the ornamental bar between the lines.

Five abnormal fonts of the figure "1" and one each of the figures "8" and "9" were used in setting up the dates. The exact makeup of each is shown in the text by the use of the capital letter "A" for the normal figures, the capital letters "B", "C", "D", "E" and "F" for the abnormal "1's", the capital letter "H" for the abnormal "8" and the capital letter "I" for the abnormal "9". The capital letters corresponding to the font descriptions. Font "A" being the normal font for all figures.

Font "A"—The normal font. Light 3 mm. type. The figure "1" has horizontal serif and base.

Font "B"—Figure "1" only. Heavier 3 mm. font with horizontal serif and base.

Font "C"—Figure "1" only. 3 mm. font with crossbar at top and bottom.

Font "D"—Figure "1" only. Heavy  $3\frac{1}{2}$  mm. font with short diagonal serif and base.

Font "E"—Figure "1" only. Slender 3 mm. font with short horizontal serif and base.

Font "F"—Figure "1" only. Similar to Font "A" but wider shaft.

Font "H"—Figure "8" only. Heavy  $3\frac{1}{2}$  mm. font.

Font "I"—Figure "9" only. Heavy 3 mm. font.

Note: All in black ink unless otherwise noted.

*Type 2*—Same font and makeup as Type 1, except that the top line is 23 mm. long. Types 1 and 2 occur on the same sheet. All values are normally without the period after the year, beginning with the "Mar. 1, '99" date. In one instance a real small comma was used in the date and will be known as Font "B". There was either an intentional or accidental use of the figure "1" for a letter "L" and vice versa, as varieties exist with a "1" for an "L" in Ambler and also in the month, and with an "L" for a "1" in the date.

Font "B"—comma is half the size of the normal one.

DR. KILMER & CO.  
BINGHAMTON, N. Y.

**TYPE 1**—Four line horizontal printed cancelation, with the initials above, city and state in the next two lines, and the date below. This type is made up of the "Celtic" and "Gothic" fonts used on the "I. R." on postage provisionals, which were used by this company early in July, 1898, until the regular revenues were obtainable from the revenue office. The first three lines and the month and year are of the "Celtic" type and the day is of the "Gothic" type.
